

Amendments to the Claims

The "Listing of Claims" replaces all prior versions of the claims in the application.

Listing of Claims:

- 1-12. (Cancelled).
13. (Currently Amended) A capacitor, comprising:
a first electrode comprising a first plurality of electrode portions;
a first dielectric disposed over the first electrode; and
a second electrode formed from a metallic foil and disposed over the first
~~comprising a second plurality of electrode portions spaced from the first plurality of~~
electrode portions; and
a dielectric ~~contacting the first electrode portions.~~
14. (Original) The capacitor of claim 13, further comprising: a dielectric material that contacts and substantially encases the capacitor.
15. (Currently Amended) The capacitor of any one of claims 13 or 14 wherein one or more of the ~~first~~ plurality of electrode portions are trimmed to achieve a target capacitance value.
16. (Currently Amended) A capacitor, comprising:
a first electrode comprising a first plurality of electrode portions;
a second electrode comprising a second plurality of electrode portions spaced from and interdigitated with the first plurality of electrode portions, wherein the first and second electrodes are formed from a metallic foil; and
a dielectric disposed between the first and second pluralities of electrode portions.
17. (Original) The capacitor of claim 16, further comprising:
a dielectric material that contacts and substantially encases the capacitor.
18. (Original) The capacitor of any one of claims 16 or 17 wherein one or more of the first plurality of electrode portions are trimmed to achieve a target capacitance value.

Application No. 10/664,638

Docket No. EL-0499 US NA

19. (Currently Amended) The capacitor of any one of claims ~~13-18~~ 16 and 17, wherein ~~÷~~ the first plurality of electrode portions comprises at least four electrode portions.
20. (Cancelled).
21. (Original) A printed wiring board containing the capacitor of any one of claims 13-18.
22. (New) The capacitor of any one of claims 13 and 14, wherein the plurality of electrode portions comprises at least four electrode portions.
23. (New) The capacitor of Claim 13, wherein the metallic foil comprises copper.
24. (New) The capacitor of Claim 13, further comprising a third electrode and a second dielectric disposed on the second electrode, wherein the second electrode is isolated from the first and third electrodes, and wherein the first and third electrodes are separated from the second electrode by the first and second dielectric which forms a two-layer dielectric.
25. (New) The capacitor of Claim 16, wherein the metallic foil comprises copper.
